

Re: Ohio Rubber  
Lake County

July 16, 1985

Mr. Conrad Hornung  
Ohio Rubber Company  
3911 Ben Hur  
Willoughby, Ohio 44094

Dear Mr. Hornung:

Thank you for your time and courtesy extended to our representatives while conducting a facility inspection on July 11, 1985. As explained, Mr. Dan Powell will handle the air contaminant sources, Mr. Marty Hilovsky will handle direct wastewater discharges to waters of the state and this writer will handle indirect discharges to the sanitary sewer. Correspondence with Messrs. Powell and Hilovsky will be under separate cover.

This letter is in regards to wastewater discharges. In order to determine what permits and plan approvals are necessary, a detailed floor plan will have to be evaluated. As discussed, this plan should include the location of buildings, parking areas, property lines, treatment facilities, and process equipment. Include the location of all sanitary and storm sewers, manholes, floor drains, and trenches. Indicate all sources of wastewater and related points of discharge.

We realize that all this information may not be readily available. Within thirty (30) days from the above date please submit to this office a brief report describing your progress. Please include a date by which we may receive the completed floor plan and required information.

Sincerely,

Sandy Kausek  
District Pretreatment Coordinator
